1. Product Category

- Selected Category: Tea

2. Brand Development

Brand Concept

The brand identity of **CelesTea** is established on luxury, historical heritage, authenticity, and premium sophistication. Moving away from standard, overcrowded commercial supermarket visuals, the product targets a premium aesthetic that honors Sri Lankan roots while positioning itself as an elite, high-end collector's or gift item.

Target Audience

Wealthy tourists, high-end gift shoppers, and the premium export market. It targets consumers who don't just want tea; they want an authentic, premium piece of Ceylon's history.

3. Creative Writing

Brand Name

- **Brand Name:** CelesTea
- **Linguistic Rationale:** A clever portmanteau combining "**Celestial**" (representing divine, heavenly, and supreme quality) and "**Tea.**" It simultaneously plays on the phrase "**Ceylon Tea,**" seamlessly blending global luxury perceptions with Sri Lanka's world-renowned tea-producing heritage.

Tagline

- **Tagline:** *"From Ceylon's peaks to your cup"*
- **Rationale:** Composed of exactly **6 words** (tailored cleanly to the brief), this tagline establishes a poetic sense of place, origin, and premium quality. It narrates a literal and sensory journey from the misty high-altitude mountains directly to the consumer's ritualistic tea experience.

4. Typography

Brand Name (CelesTea)

Font: Garamond

Set Serif typography naturally communicates trust, elite heritage, and established luxury. The custom leaf-like curves and inner texture remove any synthetic, flat digital feel, giving it an authentic, hand-crafted appearance.

Tagline

Font: Garamond

Set Sans-Serif entirely in lowercase. By reducing its weight and visual footprint, it establishes a distinct visual hierarchy that prevents it from competing with the main brand name while remaining highly legible.

Supporting Metadata

Font: Garamond

Used at the top ("Since 1967") to ground the design with essential information, ensuring the container reads like an authentic, high-end export product.

Product Variant (BLACK TEA)

Font: Georgia

Set in a clean, bold, all-caps sans-serif font to clearly identify the tea type. The wide tracking (letterspacing) gives it a modern, premium aesthetic that balances out the traditional serif elements of the brand name, while the center alignment creates vertical symmetry.

Net Weight Label (180g)

Font: Garamond

Placed subtly in the lower-left corner. By using a muted gold serif style, it flows naturally with the surrounding foliage and ornate border. Keeping the scale intentional prevents it from disrupting the hierarchy of the central illustration while serving its regulatory purpose.

5. Packaging Design

Front Panel Text Layout

- Top Center: Since 1967 (Framed structural banner)
- Upper Center: CelesTea (Primary Brand Mark)
- Mid-Upper Center: from Ceylon's peaks to your cup (Tagline)
- Main Visual Canvas: Centered vintage vector woodcut engraving of a traditional Sri Lankan female tea plucker.
- Top Right Accent: Ethical Tea - Sri Lanka (Circular Quality Emblem)
- Variant Identifier: BLACK TEA

Color Palette

Element	Hex Code	Design Logic & Justification
Primary Base (Deep Twilight Green)	#0D2219	This rich, deep forest tone establishes the core theme of tea leaves and mirrors the lush, mist-covered mountain valleys of Sri Lanka at dusk. It replaces standard commercial greens to create a moody, premium depth that communicates an elite luxury product.
Primary Accent (Antique Metallic Gold)	#A1824A	Used for the highly intricate decorative filigree border, the main brand name outline, and the organic leaf details. This specific muted gold tone communicates royal heritage, exceptional craftsmanship, and premium export quality without being overly bright or synthetic.
Secondary Accent (Warm Ochre Gold)	#BF9B54	Applied as a brighter mid-tone gradient within the central illustration of the tea plucker and the foliage. This adds necessary depth, visual hierarchy, and dimensional contrast against the dark background, highlighting the artwork's fine woodcut lines.
Typography Core Fill (Antique Yellow-Gold)	#9C9E4F	Applied as the inner solid fill for the main brand name "CelesTea." This specific historic yellow-gold hue was selected to maximize value contrast against the deep twilight green background. It ensures high legibility and instant brand recognition from a distance while reinforcing the product's premium, antique luxury identity.
